## SkyCell joins Air France KLM Martinair Cargo's SAF programme

**Air France KLM Martinair Cargo (AFKLMP Cargo) is proud to announce that SkyCell has joined its sustainable aviation fuel (SAF) programme.**

Founded in 2012, SkyCell focuses on catering to pharmaceutical supply chains by providing temperature-controlled hybrid containers and advanced technological solutions to safeguard crucial medications. The company has now become one of the pioneering Pharma partners in AFKLMP Cargo's sustainable aviation fuel (SAF) programme.

The signing ceremony was held at AFKLMP Cargo's headquarters at Amsterdam Airport Schiphol. Executives from both companies were present, including Floris Oei (Sales Excellence and Sustainability Lead at AFKLMP Cargo), Steven van Halewijn (Business Development Manager Pharma at AFKLMP Cargo) and Michael Heggling (Global Sustainability Manager at SkyCell).

**Mathieu Fleisch, Vice President of Verticals at AFKLMP Cargo:** *"We are excited to welcome SkyCell as a new partner to our SAF programme. This partnership reaffirms our joint commitment to sustainability. We firmly believe that through such collective efforts, we can ignite inspiration within the entire industry to foster a thriving market for SAF in the years to come."*

**Michael Hegglin, Global Sustainability Manager at SkyCell:** *"SkyCell's commitment to sustainable airfreight is unwavering and our SAF partnership with AFKLMP Cargo is a testament to that commitment. This fuel will enable us to transport life-saving medication with minimal harm to the environment."*

This collaboration underscores the partners' joint commitment to accelerating the shift towards a more sustainable airfreight industry.

---END---

### **About SkyCell**

SkyCell is a purpose-led technology company transforming the pharmaceutical supply chain through a combination of proprietary software, hardware, and big data. It is the leading manufacturer of hybrid, temperature-controlled, door-to-door container solutions. These allow pharma companies to optimise their supply chain by reducing, and even predicting, the risks associated with delivering sensitive pharmaceuticals by air.

Its SaaS solution, SkyCell SECURE, combines simulation data with operational data (S+O data), giving pharma companies real-time, end-to-end oversight of every shipment around the world. Its automated approval capability reduces quality approval time from an average of days to just hours, getting life-changing drugs to consumers faster. Designed with sustainability as a core principle, SkyCell is already climate-neutral today (Scope 1&2 compensated) and has committed to the goal of end-to-end net-zero emissions by 2040.

### **About Air France KLM Martinair Cargo**

The Air France-KLM Group is a global airline group with a strong European base. Its main areas of business are passenger transport, cargo transport and aeronautical maintenance. Air France KLM Martinair Cargo is the Air France-KLM Group's dedicated air cargo business.
